

TOPFIELDS BORNEO SDN. BHD.

(1294574-M)

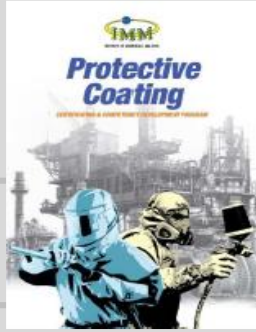

(formerly operating as TOPFIELDS BORNEO PLT since 2017)

BLASTING & PAINTING SERVICES

TOPFIELDS BORNEO SDN BHD provides Blasting & painting services for onshore/offshore facilities in various sectors including oil & gas, energy, marine, manufacturing & oil palm. We also provide shop blasting/coating services to our clients.

IMM – SSPC BLASTING & PAINTING TRAINING CENTER

TOPFIELDS BORNEO SDN. BHD. provides blasting & painting related Training.

COURSES PROVIDED:

IMM-SSPC Blasting Painting (C7 C12) B1B2 Certified Assistant B&P

IMM Coating Inspector Level 1 & Level 2 (CIL1 & CIL2)

SUPPLY OF TOPGAUGE INSPECTION TOOLS

TOPFIELDS BORNEO SDN BHD. introduces our range of painting inspection equipment TOPGAUGE which includes dry film thickness gauges, wet film thickness gauges, surface profile gauges, infrared thermometers, magnetic surface temperature gauges and whirling hygrometers.

MANPOWER SUPPLY & INSPECTION SERVICES

Professional Manpower Supply services for project management, inspection & skilled labour is the core business of TOPFIELDS BORNEO SDN. BHD. We strive to provide our customers with the best project management, site management and skilled labour that meets your project & clients requirements.

INDUSTRIAL SUPPLIES

TOPFIELDS BORNEO SDN BHD warehouses and maintains stock from numerous other known brands of blasting & painting supplies, safety supplies & paint materials

SUPPLY OF HIGH PRESSURE AIRLESS SPRAY HOSES

TOPFIELDS BORNEO SDN BHD introduces our range of high pressure airless spray hose TOPSPRAY HS 119(5800psi)

QUALITY POLICY

TOPFIELDS BORNEO SDN BHD is committed to ensure all our products and services meet clients' unique requirement, providing on schedule delivery time and to complete all services awarded to us on time and within the objectives outlined as follow:

1. Provide innovative solutions to their problems.
2. Meets our client's needs & expectations in delivering our solutions.
3. Commits to continue on research & development in providing unique & innovative solutions.
4. Ensures that the personal attention to our clients is maintained & enhanced.

Central to this policy is the pursuit of technological & management excellence to ensure that proactive actions are consistently taken to improve on the technology, processes, products and most important of all, our services to our clients.

DRUG & ALCOHOL POLICY

In accordance with Our Health, Safety and Environment Policy, Topfields Borneo Sdn. Bhd. recognizes the ill effects of drug and alcohol abuse towards employees' work performance and the company's commitment towards health, safety and environment in carrying out operations. The company employs a no tolerance policy to ensure that all **TBSB** employees are not under the influence during their presence at workplace.

This policy shall be enforced through drug and alcohol test programs conducted at the workplace at regular intervals which all employees are subject to at any time, at the discretion of the management. Employees who are found to be in contravention of the said guidelines shall be subjected to disciplinary action.

The company requires all its employees, contractors and others to strictly adhere to this policy at all times. Joint venture partners of the company are expected to implement an effective drug and alcohol program, which is in line with the industry's best practices.

SAFETY & HEALTH POLICY

Topfields Borneo Sdn. Bhd. sets its goals towards Safety, Health and the Environment by developing business activities in accordance to all related statutory and regulatory standards that govern Occupational Safety and Environmental Protection in Malaysia. We will endeavor to ensure our activities, services and products do not endanger our employees, suppliers, our clients and the public and whoever that has dealings with our organization. We believe and are confident that the principles of safety and health, when rightly implemented, are fundamental to the effective implementation of this Policy.

Our HSE committee is chaired by its Director, under the guidance of a Safety and Health Officer (SHO) as an external consultant.

MANAGEMENT RESPONSIBILITIES

Prepares and maintains a high standard of safety and health measures of each facility, equipment and system accompanied by the appropriate measures for welfare and emergency safety facilities.

Provides training and information to all employees, suppliers, associates and clients regarding the risks that they face in their working environment.

Provides sufficient safety and protective equipment for every employee.

Abides by the stipulated safety and health rules and regulations of Malaysia and promote the best safety practices.

Ensures all activities and work areas are safe and free from any dangers or risks to health.

Provides an effective communication protocol, which the management and the employees as well as our clients can co-operate and work together on developing and promoting measures in ensuring safety in our working environment.

Develops and updates the emergency procedures in accordance with the requirement of the Malaysia n Statuary and regulatory requirements.

Coating Thickness Gauges are typically used as a means of quality control during after paint application. The Dry Film Thickness gauge is than used after the paint has dried by the Quality Control personnel to verify and report that the paint application has met the project requirements.

Surface Profile gauges are used to measure surface profile or anchor pattern of a steel substrate after surface preparation by blasting or other mechanical methods. The purpose of measuring the surface profile is to meet the requirements of the coating ensuring that the coating applied adheres to the steel substrate after curing.(Mechanical Bonding)

Generally, the wet film thickness gauge is used by a painter to check if the paint applied has met the requirements of the project.

Ambient Conditions and Temperature monitoring devices are using as part of quality control process during Blasting & Painting Activity.

Relative Humidity, steel temperature and dew point temperature monitoring process is vital, without proper monitoring condensation of dew or moisture on the surface of the substrate is likely to occur after blasting or before paint film application.

Topfields Borneo Sdn. Bhd. manufactures a range of ambient conditions monitoring devices such as Whirling Hygrometers, magnetic surface temperature gauges and infrared thermometers.

TOPGAUGE DFT 219

Dry Film Thickness Gauge(detachable probe)

TOPFIELDS BORNEO SDN. BHD. provides a portable dry film thickness gauge that is capable of measuring coating thickness quickly, precisely and suitable for both laboratory and fields engineering environment

Model	TOPGAUGE 818
SUBSTRATE RANGE	FE/NFE
RANGE	0-2250um(Fe)/0-1250um(Nfe)
Accuracy error	± 1+3% or 2.5um(whichever is greater)
Power	2x1.5vAAA battery
Unit	Um/mil
Temperature	0-40°C
Humidity	≤85%
Minimum Curvature	5 mm convex; 5mm concave
Weight	90g
Size	120mm*63mm*25mm

Product Accessories

Standard Accessories	Main Unit (1pc)
	Fe & Nfe Dual Probe(1pc)
	Calibration Foils (1set)
	Substrate (Iron)
	Substrate (Aluminium)

TOPGAUGE SPG 1018

Digital Surface Profile Gauge

TOPFIELDS BORNEO SDN. BHD. introduces a digital surface profile gauge for blasting & painting industry. This equipment is suitable for both laboratory and field environment. The liquid crystal display clearly shows all the measured parameter with high accuracy.

FEATURES

- Metric & Imperial units available
- Direct measurement of the surface peak-through height
- Data can be transferred through USB, RS-232 to pc connection or by Bluetooth.
- Provides a maximum value latch & undervoltage alarm function.

Product Description

Display	LCD Display
Resolution	1 um (0.1mils)
Range	0-750 um (0-29.5mils)
Measurement Speed	>30 readings per minute
Operating Humidity	No more than 85%
Accuracy	±5% or ±5 um (whichever is greater)
Operating Temperature	0°C - 50°C (32°F - 120°F)
Power Supply	2 x 1.5 V AAA (UM-4) Battery
Weight	310g (Not including Batteries)
Size	170mm*63mm*24mm

TOPGAUGE DTG219

Micrometer Surface Profile Gauge

TOPFIELDS BORNEO SDN. BHD. provides portable Micrometer Surface profile gauges suitable for obtaining peak to valley surface profile reading from replica tape that is displays digital and clear reading can be used for for both laboratory and field engineering environment

FEATURES

- Large LCD display for easy reading
- Mm/inch conversion at any position
- Zero setting at any position
- Low Voltage warning by flashing display
- Manual power on/off or auto power off
- Comes with convenient casing
- Suitable for both laboratory and field use

SPECIFICATIONS

- Range: 0-10mm
- Accuracy: +/- 0.02mm
- Top probe: 6mm
- Bottom probe: 10mm

TOPGAUGE DT8850

Infrared Thermometer

TOPFIELDS BORNEO SDN. BHD. introduces a unique method of measuring surface temperature during blasting and painting activity, using a fast and reliable method utilizing infrared thermometers. Simply aim and press the button at any object or surface. Safely measures temperature of hot, hazardous and hard to reach areas.

FEATURES

- Compact & Easy to use
- Wide measurement range, -50°C to 850°C
- Comes with convenient pouch bag
- Suitable for both laboratory and field use

FEATURES

- Simply design and easy to read
- Simple measurement of relative humidity & dew point temperature.
- Comes with a pocket sized leaflet hygrometric table
- Comes with convenient pouch
- Suitable for both laboratory and field use

HEADQUARTERS :

No.50, Lot 2624, Kidurong Gateway Business Park, Block 20, Kemena Land District, 97000 Bintulu, Sarawak

TOPGAUGE UA-963

Humidity & Temperature Meter

FEATURES

- Large LCD display for easy reading
- Lightweight
- Comes with convenient pouch bag
- Suitable for both laboratory and field use
- Enable/disable auto power off: The meter shuts off automatically after 15 minutes inactivity under auto power off mode, disable auto power off is available

Model	TOPGAUGE UA-963
Humidity range	0~100%RH
Temperature Range	-20°C~ 70°C/-4°F~ 158°F
Temperature Accuracy	±1.0°C/±2.7°F
Dew point temp Range	20°C~70°C/-4°F~ 158°F
Dew point temp Accuracy	±1.5°C/±2.7°F
Data update	0.5s
Operating conditions	-20~60°C/-4°F~140°F, 10RH%~90RH%
Storage conditions	-20~60°C/-4°F~140°F, 10RH%~75RH%
Weight	75g
Size	168*56*30.5mm
Power supply	3*1.5V"AAA" batteries (Not included)

TOPSPRAY HS119

Airless Paint Spray Hose (5800psi)

TOPFIELDS BORNEO SDN. BHD. manufacturers high pressure reinforced airless paint spray hoses. TOPSPRAY HS 119 comes with 1/4" female NPT Fittings & Spring Guard. Uses

Made from PA12 material for superior mechanical properties.

PA 12 (also known as Nylon 12) is a good general-use plastic with broad additive applications and is known for its toughness, tensile strength, impact strength and ability to flex without fracture.

FEATURES

- Tube:** internal core in polyamide
- Reinforcement:** one layer steel wire
- Cover:** polyurethane
- Temperature:** -40°C to 100°C

CHARACTERISTICS

- High abrasion resistance
- High operating pressure(5800psi)
- Chemical and solvents resistant

6.4mm	14.0mm	40 Mpa	120MPa	55mm
1/4"	0.49"	5800psi	17400psi

IMM-SSPC Blasting Painting (C7 C12) B1B2 Certified Assistant B&P

Become an SSPC certified Blaster Painter with IMM C7 & C12 program today. Our C7 and C12 program has become our local industry standard. Furthermore, this professional certification is issued by IMM/SSPC to qualify you to work as a blaster painter within Malaysia or internationally.

IMM Assistant Blaster Painter B1B2 program is the first professional blasting & painting program you should undergo to become a certified blaster painter in the oil & gas industry.

IMM Coating Inspector Level 1 & Level 2 (CIL1 & CIL2)

IMM Coating Inspector is the most sought after certification to become a coating inspector within Malaysia & is widely accepted by all industries including Oil & Gas.

IMM-SSPC Blasting Painting (C7 C12) B1B2 Certified Assistant B&P

WHO SHOULD ATTEND ?

- Contractors and facility owners
- Project supervisors
- Contractor craftworkers who wish to obtain certification
- Others who wish to learn about dry abrasive blast cleaning of steel

▣ Abrasive Blasting Program (C7)

- Principles of Surface Preparation • Nozzle Abrasive Blast Cleaning Systems (with Hands-On Session) • Wet Abrasive Blast Systems (with Hands-On Session) • Abrasives • Portable Centrifugal (Wheel) Abrasive Blast Cleaning Systems (with Hands-On Session) • Abrasive Blast Cleaning Nonferrous Substrates

▣ Spray Application Program (C12)

- Introduction/Overview of Airless/Conventional Spray Equipment Operational Systems • Proper Mixing Techniques • Proper Spray Techniques • Troubleshooting • Convention Spray (optional)

IMM Coating Inspector Level 1 & Level 2 (CIL1 & CIL2)

Who should apply?

The scheme is suitable for persons such as painting inspector, painting supervisor, technicians, specifiers and engineers who have been trained and/or have experience in coatings inspection and desire to be certified for career advancement.

CIL1 - IMM Coating Inspector Level 1

1. Basics on corrosion theory 2. Composition & manufacture of paints 3. Surface preparation 4. Application & storage of paints 5. Paint faults and coating defects test 6. Measuring instrument / Inspection – Diagnose Failure 7. The role of a coating inspector / ITP 8. Painting specification 9. Calculation / Mathematics' 10. Safety and health

CIL2 - IMM Coating Inspector Level 2

1. Corrosion theory and terminology 2. Advance surface preparation 3. Advance Paint faults and coating defects test 4. Measuring instrument / Inspection – Diagnose Failure 5. Composition & manufacture of paints 6. Application & storage of paints 7. The role of a coating inspector / ITP 8. Painting specification 9. Calculation / Mathematics' 10. Safety and health
